FYI. Matt mentioned that they did these EJSCREEN runs on various segments of the Animas River yesterday from center of the river out to one mile radius.

Subject: EJSCREEN Reports for Animas River

Matt/Mustafa,

Attached are EJSCREEN reports for areas along the Animas River. Instead of only pulling reports from areas near the mine which have very small populations, I pulled reports for important locations. So I have reports for five sites along the river:

- [] [] [] [] [] [] The river immediately south of the spill site
- [] [] [] [] [] [] The river near Silverton, CO where it becomes the Animas River
- [] [] [] [] [] [] Durango, CO
- [] [] [] [] [] [] The Ute Reservation
- [] [] [] [] [] [] Farmington, NM where it becomes the San Juan River

Let me know if you need anything else on this or need me to explain anything. Thanks,

Tai
